IMPORTANT NOTICE REGARDING FLOWER SEEDS

The available supply of Flower Seeds for the coming season is short. The European War has made it impossible to import many varieties which American seedsmen depended on securing from foreign growers and also such other items as were not being produced in this country. On top of this, California flower-seed growers have been seriously handicapped in production because of labor shortages. We believe, therefore, it will be good business for you, Mr. Florist, to purchase at once such flower seed items as you may anticipate using during the next few months.

Michell's Superb Asters

We wish to emphasize the fact that our Asters are grown for us by specialists, and nearly all varieties under our own supervision. **Michell's "Distinctive" Quality** is nowhere more prominent than with our Asters.

SPECIAL NOTE.—In growing Asters, old soil and flats should never be used the second time without thoroughly sterilizing, to avoid the numerous diseases to which Asters are so susceptible. Barnyard manure should never be employed as a fertilizer. We recommend the use of finely ground bonemeal. Asters should not be grown in the same location two years in succession.

Fusarium-Wilt Resistant Strains

These we believe to be practically immune to this disease. We feel sure that by using this seed many disappointments due to crop failures will be eliminated.

ASTERS, SINGLE GIANT CALIFORNIA SUNSHINE

This supremely beautiful new race of Asters is the result of a direct cross between California Giant and the Dwarf Sunshine type. The plants grow 3 feet high and bear blossoms 5 to 6 inches across, on long stiff stems. The dual color-tone effects formed by the quilled discs and encircling guard petals are lovely beyond description; the quilled discs are lighter than the guard petals and as the flowers age the lemon centers turn to the color of the outer petals. We highly recommend this lovely Aster.

Mitchell's Giant Petunias

We are headquarters for this florist's popular pot-plant. The following list is selected from the finest strains of Petunias that are grown in Europe and California. We supply the most critical trade in every state in the Union with our selected strains.

Petunia, Mitchell's New Victory

OUTSTANDING PETUNIAS EXCLUSIVE WITH MITCHELL'S

NEW VICTORY. Extra-dwarf super-giant Petunia. Large deep-throated fluted flower averaging up to 7 inches across. Plant habit very bushy and free flowering. An exclusive formula mixture, color-range of light and dark shades. A special strain for pot-growing.

$\frac{1}{2}$ trade pkt. 75c; trade pkt. \$1.25; $\frac{1}{4}$ oz. \$2.25; $\frac{1}{32}$ oz. \$4.00.

NEW DAZZLER. The brightest color in Petunias—orange and rosy-scarlet tones, plain and semi-ruffled, golden and white threaded large flowers. Plants dwarf compact habit, fine for bedding and for pots.

$\frac{1}{2}$ trade pkt. 75c; trade pkt. \$1.25; $\frac{1}{4}$ oz. \$2.25; $\frac{1}{32}$ oz. \$4.00

IGLOO. Bronze Medal, All-America Selections. This new extra-compact white Petunia produces flowers of medium size, pure white, with a slight yellow throat, and coming 100% true. The plants are uniformly compact throughout the season, and continue to flower until frost. The plant is a perfect mound of white, 8 to 10 inches in height, reminding one of an Eskimo igloo. This variety is ideal for borders, also splendid for pots.

Trade pkt. 75c; $\frac{1}{32}$ oz. \$1.50; $\frac{1}{8}$ oz. \$2.75; $\frac{1}{16}$ oz. \$5.00

ENGLISH VIOLET. Honorable Mention, All-America Selections. A new and most pleasing shade of violet-blue Petunia, different from any other of the mid-blue varieties. It is almost the same beautiful color as English violets and, very important, it will hold this uniform color throughout the season. The plants grow normally 15 inches high, quite compact, and we believe the best mid-blue dwarf bedding Petunia yet introduced.

Trade pkt. 50c; $\frac{1}{32}$ oz. 90c; $\frac{1}{16}$ oz. \$1.65; $\frac{1}{8}$ oz. \$3.00

NOTICE. Double Petunias are a highly bred type, and the seed is not as vigorous in growth as that of single strains. Seed of all our Double Petunias has been carefully tested in soil, September, 1943, and the germination has been found to average 70 to 80 per cent. For this reason, and because of its high cost, we cannot entertain claims on non-germination of this seed, or requests for replacements. If carefully handled we know the seed will grow.

New Double Mitchell's Supreme No. 1

We take pleasure in offering this American-grown select strain double Petunia to our florist friends. This is a choice selection of large double fringed Petunias in a grand assortment of colors, including several scarce shades—Salmon, Dark Red, etc. The flowers are huge, beautifully fringed, and the habit of growth is semi-dwarf. The percentage of doubles is very high.

$\frac{1}{2}$ trade pkt. \$1.25; trade pkt. \$2.00; $\frac{1}{4}$ oz. \$6.50; $\frac{1}{32}$ oz. \$12.00

EXTRA PROFITS IN LAWN SEED

NOTICE—Due to the present shortage of metal, the WPB will not allow the manufacturing of tin containers for grass seeds. This condition, however, will in no way affect the seed, which will be of our usual high quality and it must pass our rigid specifications of purity, germination and maximum freedom from weeds. The ½-, 1- and 3-pound packages will be packed in extra-strong brown Kraft paper bags and the 5-, 10- and 25-pound packages, in the usual cotton bags.

You can make an additional quick profit this spring by stocking Michell's Best Quality Lawn Seed Mixtures. The flower shop or greenhouse is a natural outlet for Lawn Seed, and many of our customers have built up a considerable spring trade in this line.

Our policy of furnishing fresh seed only does not permit any consignment arrangement, and all seed is offered on the basis of outright sale.

The Deals listed below offer conservative quantities which should not require any effort to move in one season. Special prices on larger quantities will be quoted on request.

Our connections with the most reliable producers in this country and abroad place us in a position of advantage for our supplies, chiefly because of the large volume of Grass Seed for which we contract.

We are always pleased to submit samples, with prices, for comparison and let our customers be the judges.

Michell's Profit-Providing Bulbs for Florists

Fancy-Leaved Caladiums

We list only choice named and newer sorts, including Brazilian types. They cover a wide range of bright colorings and markings too difficult to describe. For summer store decoration or as pot-plants, we know of nothing finer. Start bulbs in damp moss with plenty of bottom heat and an occasional dampening. Do not allow them to get chilled, and at all times grow them in a warm, shaded place.

This handsome African tuberous-rooted plant, known as the "Climbing Speciosa Lily," has been used mostly as a greenhouse climber, but can be grown very successfully as an outside climber if given a warm, sunny location. It reaches a height of 6 to 8 feet and produces large, gorgeous, lily-like flowers which open bright yellow, but change to a deep scarlet.

Montbretias, Giant-flowering Varieties

Montbretias resemble miniature gladiolus, are fine for cutting, and excellent for border planting. They prefer a light, loamy soil, well enriched with leaf-mould, but no manure or chemical fertilizer should touch the roots; a little bonemeal and a light top-dressing of lime should prove beneficial. They will thrive either in partial shade or full sunlight, but see that the moisture supply is good at all times.

MICHELL'S SPECIAL BRAND LILY BULBS

Suggestions in Connection with the Growing of Hardy Lilies Under Glass

Hardy Lilies should be grown cool and given 16 to 18 weeks from time of planting to bring them into bloom, so the best results can be obtained; in fact, if you can give them longer to come into flower it is better. Where they are forced with plenty of heat, the result is that you get good foliage with not so many early blooms.

Miscellaneous Hardy Lilies

The hardy native Lilies are always an attraction and can at times be utilized in various ways, by reason of their oddity.

Panamiga

This is a dainty new house plant from our sister republics in South America. Panamiga grows in tropical woods from Panama to Brazil and prefers medium shade. The leaves, of metallic gloss, change in color from olive-green to purplish bronze and are crinkled and hairy. The graceful flowers resemble fine white lace; they appear on the end of the little branches and partly cover the upper leaves. Panamiga has a very neat and compact growing habit and makes salable plants in record time.

HOW TO GROW PANAMIGA

PANAMIGA grows in any light soil, likes rather dense shade and the same general conditions as *Philodendron cordatum*. During the summer it grows very well in a shaded frame outdoors. Give frequent applications of liquid plant-food. Not subject to insect trouble.

Gardex "Soil Flow" Tools are weapons of war in that they help produce and increase the emergency food supply. They do better work faster. These modern tools enable the farmer and gardener to do their work in a much easier and more efficient manner. They eliminate the hard work, stooping, bending, and back-breaking, chopping motions. In hoeing the old-fashioned way you tramp down the newly cultivated soil, whereas the Gardex you walk away from it, leaving it loose, as you desire to have it. Tools are not lifted out of the soil, but stay in the ground as you go along thus saving you a lot of energy. They have been successful not only in the garden, but also on the farm, in vineyards, and in forests.

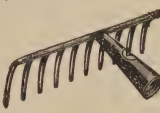

Seven Tools in One—Gardex New Interchangeable Cultivator. Only four parts. The wing screw holds

all prongs tightly in place, yet permits quick changing to a Cultivator with 1, 2, 3, 4 prongs, thus one can cultivate in rows of various widths or straddle the rows. The one-prong tool can be used in small corners or very narrow rows, because the prong-holder is no wider than the prong itself. Price, \$1.50.

No. 1523. Gardex Cultivator with Weeder. Cultivate and weed with one tool. The 3-prong Cultivator loosens the soil thoroughly while the weeding-blade cuts off weeds quickly. One tool for two purposes. Painted red. 3 prongs 4½ in. wide. Weeding-Blade 4 in. Price, \$1.25.

No. 251. Gardex Curved. Tooth Rake is equipped with Gardex handle socket which does not allow the handle to wobble. It is a well-balanced Rake which will rest easily in the hand without tiring the arm. An all-steel Rake of good quality. Painted green. 14 teeth. 5-ft. length. Price, \$1.00.

No. 751. Gardex Dibble. Made of steel, hollow, light as a feather, with a pistol grip which does not tire your hand when planting. Painted red. Half polished. Size over all 11¼ in. Price, 85c.

No. 750. Gardex Hollow Planter.

Lifts out the earth through its conical tube. This tool is especially suited for hard soil; with its pistol grip it is pushed into the soil, given a quarter turn and then lifted out. The soil is not packed but taken up by the hollow tube automatically through the opening at the top as the next hole is dug. Thus the walls of the hole are not packed, which gives the young plants an easy bed for a quick start. Painted red. Half polished. Diameter of hole, 1½ in. Price, 80c.

Michell's Offering of New Patterns of Metalline

These five new patterns are of the latest design and entirely different, as well as popular priced.

Pattern 1950. Width 150

A three-striped Metalline of fine weave, the stripes being satin finish and the spaces between of a dull rayon which makes the design outstanding. The finish is of good texture permitting the ribbon to be made into a very nice bow that will hold its shape. We recommend this pattern for cheaper work, especially designs for your popular-priced funeral work. Price, \$1.40; 12-piece lots, \$1.35 per piece.

Pattern 1941. Width 150

An exceptionally heavy quality of woven material very suitable for the better grade of funeral work. Each edge has over 1 inch of taffeta weave, and the wide center is of a pebble-weave effect with ample space for lettering. This item is manufactured purposely for good work and makes a very beautiful bow that will stand out. It is not water-proof but has proved water-repellent and can sustain the elements, which would make it suitable for door-crapes as well as funeral work. We highly recommend this pattern as it makes a much nicer bow than satin ribbons. Price, \$2.50; 12-piece lots, \$2.35 per piece.

These patterns are put up 40 yards to a piece and are made in the following colors:

White	Purple	Better Times	Gray
Pink	Blue	Picardy	Premier
Lavender	Nile Green	Butterfly	Columbia
Orchid	Yellow	Ophelia	Fuchsia
Violet			Gold

These patterns are all different from those we have listed in past years, and we suggest you send us orders for some of each of these items. They are of the latest design and manufactured from the best rayon obtainable. As prices are subject to change without notice, it is important that you grasp this opportunity to supply your wants for the fall season without delay.

Neponset Paper Pots
Green—For Growing

This new development makes it possible to take advantage of the economy, ease and convenience of Paper Pots for the full growing period of young plants without any damaging or retarding of root-growth. The special water-proofing treatment of these Pots seems to encourage healthy growth; not necessary to use clay pots.
